DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 8-12, 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Grundy et al PG-PUB 2004/0010653.

Re Claims 8, 14, fig. 1 teaches a gateway with plurality of ports communicates with DHCP server that store addressing information (storing an IP address); the processor 108 performs routing function by assigning local IP address to each ports on the gateway [0053]; in particular, fig. 2 teaches step 218 determines whether the destination node (target node) should be routed locally or via WAN whereby based the destination node sets a local addresses (an IP address) to each ports (first and second port) wherein the local addresses are the same.

Re Claims 9, 10, 11, refer to Claim 8, wherein the DHCP server store information about ports; the gateway intercepts the data stream and based on the information determines (processing the data) to route (transmitting) locally or via WAN (destination) wherein the data stream is translated accordingly (a newly made data).

Re Claim 12, refer to Claim 8, wherein the DCHP further includes LAN addressing information and translator module to perform ARP function.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 15 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 15 is functional language.

Allowable Subject Matter

4. Claims 13, 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

In combination with Claims 8 and 13, prior art fails to teach activating and deactivating the ports when setting the IP addresses.

In combination with Claims 14 and 16, prior art fails to teach the gateway transmitting the IP address of the target node with a local loop back process whereby the IP address of the target node and the IP address of the first port being the same.

5. Claims 17-19 are allowed

Response to Arguments

6. Applicant's arguments with respect to claims 8-12, 14 have been considered but are moot in view of the new ground(s) of rejection.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Lee whose telephone number is 571-272-3130. The examiner can normally be reached on Monday to Friday from 8:30AM to 6:00PM.
